

Add:

$$\begin{array}{c} \mathbf{6} \\ \square + 7 \left(\begin{array}{c} \curvearrowright \\ \curvearrowleft \end{array} \right) \square - 7 \\ \mathbf{13} \end{array}$$

Subtract:

$$\begin{array}{c} \mathbf{14} \\ \square - 5 \left(\begin{array}{c} \curvearrowright \\ \curvearrowleft \end{array} \right) \square + 5 \\ \mathbf{9} \end{array}$$

Subtract from:

$$\begin{array}{c} \mathbf{7} \\ 11 - \square \left(\begin{array}{c} \curvearrowright \\ \curvearrowleft \end{array} \right) 11 - \square \\ \mathbf{4} \end{array}$$

Multiply:

$$\begin{array}{c} \mathbf{8} \\ 3(\square) \left(\begin{array}{c} \curvearrowright \\ \curvearrowleft \end{array} \right) \frac{\square}{3} \\ \mathbf{24} \end{array}$$

Divide:

$$\begin{array}{c} \mathbf{35} \\ \frac{\square}{7} \left(\begin{array}{c} \curvearrowright \\ \curvearrowleft \end{array} \right) 7(\square) \\ \mathbf{5} \end{array}$$

Divide into:

$$\begin{array}{c} \mathbf{9} \\ \frac{54}{\square} \left(\begin{array}{c} \curvearrowright \\ \curvearrowleft \end{array} \right) \frac{54}{\square} \\ \mathbf{6} \end{array}$$

Exponent:

$$\begin{array}{c} \mathbf{2} \\ (\square)^3 \left(\begin{array}{c} \curvearrowright \\ \curvearrowleft \end{array} \right) \sqrt[3]{\square} \\ \mathbf{8} \end{array}$$

Power:

$$\begin{array}{c} \mathbf{5} \\ 3^{\square} \left(\begin{array}{c} \curvearrowright \\ \curvearrowleft \end{array} \right) \log_3(\square) \\ \mathbf{243} \end{array}$$

Absolute value:

$$\begin{array}{c} \mathbf{7, -7} \\ |\square| \left(\begin{array}{c} \curvearrowright \\ \curvearrowleft \end{array} \right) \pm(\square) \\ \mathbf{7} \end{array}$$

Root:

$$\begin{array}{c} \mathbf{25} \\ \sqrt{\square} \left(\begin{array}{c} \curvearrowright \\ \curvearrowleft \end{array} \right) (\square)^2 \\ \mathbf{5} \end{array}$$

Log:

$$\begin{array}{c} \mathbf{64} \\ \log_2(\square) \left(\begin{array}{c} \curvearrowright \\ \curvearrowleft \end{array} \right) 2^{\square} \\ \mathbf{6} \end{array}$$

Plus minus:

$$\begin{array}{c} \mathbf{3} \\ \pm(\square) \left(\begin{array}{c} \curvearrowright \\ \curvearrowleft \end{array} \right) |\square| \\ \mathbf{3, -3} \end{array}$$
